

base_local_planner
::TrajectoryCostFunction

```
graph BT; A["base_local_planner::MapGridCostFunction"] --> B["base_local_planner::TrajectoryCostFunction"]
```

The diagram illustrates an inheritance relationship between two C++ classes. A light gray box at the bottom represents the base class, and a white box at the top represents the derived class. A blue arrow points from the base class box to the derived class box, indicating that the derived class inherits from the base class.
